## **DETAILED ACTION**

Claims 1-24 have been examined.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 1, 2007 has been entered.

## Allowable Subject Matter

Claims 1-12 are allowed.

Claims 13-24 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Price et al. (U.S. Patent Application Publication 2005/0102362), discloses a method for using real-time communication to obtain products or services. Price discloses a real-time chat (aka Instant Messaging) application, which implies launching and logging in to the chat application, and making possible the discovery of any messages from peripheral devices: Price discloses displaying messages from peripheral devices connected to the client device; and displaying products and/or services for the peripheral device (Abstract; paragraphs 18-20, and 25). Price does not disclose selecting a peripheral device from the detected peripheral devices, but the display of messages implies some type of selection (the client device must select

messages to display, which implies selecting a message from a particular peripheral, even if the user does not necessarily select a particular peripheral to display messages from). Price does not expressly disclose obtaining products and/or services for the selected peripheral device, although presumably the "appropriate party" would respond to "an appropriate Instant Messaging message" by obtaining products and/or services. e.g., obtaining more paper from the appropriate drawer for a printer which sends an outof-paper message, but Harper (U.S. Patent Application Publication 2002/0143642) teaches obtaining such products and/or services (e.g., Abstract; paragraphs 33 and 34). However, neither Price, Harper, nor any other prior art of record discloses that logging into the real-time chat application initiates a device discovery operation on the client device. Moreover, Price tends to teach away from this, since in Price, either the peripheral device sends messages to the client device (user's workstation) when a condition such as a hardware problem or a lack of supplies arises (paragraph 20), which does not suggest a device discovery operation on the client device responsive to logging into the chat application; or else a user sends chosen commands to the peripheral device (paragraph 25), which suggests that the user knows what peripheral device he wishes to send appropriate commands to, again not suggestive of a device discovery operation on the client device responsive to logging into the chat application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mache et al. (U.S. Patent Application Publication 2001/0003202) disclose instant messaging for transmitting messages in (nearly real-time between clients (man and machine).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nicholas D. Rosen whose telephone number is 571-272-6762. The examiner can normally be reached on 8:30 AM - 5:00 PM, M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey A. Smith can be reached on 571-272-6763. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Non-official/draft communications can be faxed to the examiner at 571-273-6762.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a
